

I am a current XM Satellite Radio subscriber. The quality and variety of this service far outstrips the bland offerings I hear on FM radio stations. XM provides a tailored experience that beats hands down the corporate, impersonal service of other radio broadcasters. In addition, I welcome the chance to receive local traffic and weather from a service I privately subscribe to. The NAB should not be legislating on this matter as it is a private choice of mine who I receive this information from. Stop stifling creativity and competition on the airwaves.

Regards,
Alistair Wearmouth
